We spoke at the last two Town Council meetings on the subject of the suggested pedestrianisation of the High Street and Esplanade. You may rest assured that our views as expressed do reflect the overwhelming views of the Ventnor Business community
We wish now to put on record our continuing and strong opposition to the principle of the pedestrianisation, albeit that full details have not been fully outlined to us.
However, we do realise and appreciate the Councils drive to improve the town for visitors and residents and to that end we are keen to take part in the consultation process. We have other ideas which will boost the image and appeal of the town and are willing to put our weight behind a good scheme for everybody's benefit.
